

SLUGGING SLUGS & CONICAL SNAILS: LAKE BOLAC

Growers and advisers are invited to join slug and snail expert presenter, Dr Michael Nash, to learn about managing slugs and conical snails while maintaining sustainable farming systems, including an in-field demonstration of monitoring methods.

Presenter: Michael Nash

Michael Nash is an invertebrate ecologist, with a PhD in the integrated pest management of slugs. Michael has extensive knowledge, an engaging communication style and comes from a farming background. He helps farmers to gain the skills and insight they need to control slugs and snails. Michael is also a strong advocate for the conservation of native species in productive landscapes.

Topics

- Hands-on identification of local slug species; biology and lifecycle
- Integrated management strategies – biological, cultural and chemical
- Balancing pest management with sustainable farming systems
- On-farm demonstration of spring monitoring techniques.
