

Training from Home

Using satellites to monitor crop water use and crop growth.

AGRICULTURE VICTORIA

'IrriSAT' TRAINING

WHAT TO EXPECT

IrriSAT is a free web tool that, uses weekly satellite images to track crop water use and crop health.

In this **free** one-hour training session you will learn how to use IrriSAT to monitor crop health and growth plus estimate the water requirements of your irrigated or rainfed crops.

Be prepared to follow along on your computer as you map your own farm or paddocks.

IrriSAT requires a Google/Gmail account, so have your google account details on hand for the training, or create a new google account at: <https://accounts.google.com/SignUp>

*** No emails will be sent to this address as part of the training ***

HOW TO REGISTER

Click on this link: <https://forms.office.com/r/NfQ7S4P88d> or alternatively, call the contact number below to register, ask any questions or would like a hand setting up a Google/Gmail email address:

Noni Brislin

P: 03 5571 2526

E: n.brislin@ghcma.vic.gov.au
